ABOUT ME

Experienced React front-end developer with one year of professional experience, adept at problem-solving and collaborative project work.

PROJECTS

Health Care Ecosystem (Team Project)

- Contributed to the development of a government-sponsored healthcare ecosystem project within a collaborative team environment.
- Played a key role in designing and implementing features to manage medical treatments, patient records, and doctor interactions.
- Facilitated the integration of diverse medical facilities under different departments.
- Collaborated effectively with team members and stakeholders to meet project objectives and comply with government regulations.

Technologies: TypeScript, React.js, Redux.js, RTK Query.

Problem Management System (Team Project)

- Developed a problem management system adaptable for various projects or institutions.
- Implemented role-based relationships to facilitate efficient problem resolution, ensuring the right individuals have appropriate access levels.
- Incorporated JWT token-based authentication to enhance security, allowing for secure access control and user authentication.
- Integrated a client-to-administrator messaging system within the application for streamlined communication.

RELEVANT SKILLS

Programming Language:

- JavaScript (2.5 years)
- TypeScript (1 years)

Framework:

- ReactJS (2 years)
- Redux Toolkit
- RTK Query
- NodeJS (basic)

Others:

- Webpack
- Git & GitHub
- NPM
- Yarn
- Little Photoshop experience

- Incorporated JWT token-based authentication for enhanced security, allowing secure access control and user authentication.
- Integrated a client-to-administrator messaging system within the application for streamlined communication.

Technologies: Typescript, React js, Redux js, Rtk query, React Hook Form

A Library Js-utility Like Lodash

- A modern JavaScript utility library delivering modularity, performance & extras.
- JavaScript library which provides utility functions for common programming tasks using the functional programming paradigm.
- It can be broken down into several main areas: Utilities, Function, String, Array, Collection, Object, Sequence.

Technologies: Typescript

WORK EXPERIENCE

Front End Developer & Teach at Html, Css and JavaScript

Freelance Corner, Notun Bazar, Sadar, Mymensingh

October 2022 – 2023 March

- Leveraged my front-end development expertise to contribute to various websites built with React JS.
- While primarily focused on development, I also provided introductory guidance on HTML, CSS, and JavaScript to enhance team collaboration and project understanding.

Front End Developer

Excel Technologies Ltd.

House #13, Road #07 Block #F, Banani Dhaka-1213

May 2023 – current

- Frontend development on multiple projects using React.js.
- Contributed to various website projects, applying React.js expertise.
- Ensured high-quality UI/UX and optimized performance.
- Engaged in Agile methodologies for efficient project delivery.

EDUCATION

BSc, Geography and Environment

Ananda Mohan College, Mymensingh

July 2018 – 2011, CGPA - 2.82 (Out of 4.00)
