EXPERIENCE

Freelance Corner, Natun Bazar, Sadar, Mymensingh —
Frontend Developer

October 2022 - April 2023

Leveraged my front-end development expertise to contribute to various websites built with React JS.

Excel Technologies Ltd., House #13, Road #07 Block #F, Banani Dhaka-1213 — *React Developer*

May 2023 - March 2024

Frontend development on multiple projects using React.js. Contributed to various website projects, applying React.js expertise. Ensured high-quality UI/UX and optimized performance.

SKILLS

- JavaScript
- TypeScript
- React Js
- Next Js
- Redux Toolkit
- Node Js
- Tailwind Css
- Git & GitHub

LANGUAGES

- **English:** *Business Fluent*
- **Bangla:** *Native*

PROJECTS

Health Care Ecosystem — Team Project

- Contributed to the development of a government-sponsored healthcare ecosystem project within a collaborative team environment.
- Played a key role in designing and implementing features to manage medical treatments, patient records, and doctor interactions.
- Facilitated the integration of diverse medical facilities under different departments.
- Collaborated effectively with team members and stakeholders to meet project objectives and comply with government regulations.

Technologies: TypeScript, React.js, Redux.js, RTK Query

js-utility — A Library Js-utility Like Lodash

- A modern JavaScript utility library delivering modularity, performance & extras.
- JavaScript library which provides utility functions for common programming tasks using the functional programming paradigm.
- It can be broken down into several main areas: Utilities, Function, String, Array, Collection, Object, Sequence.

Technologies: JavaScript

Helpdesk — Team Project

- Developed a Helpdesk system adaptable for various projects or institutions.
- Implemented role-based relationships to facilitate efficient problem resolution, ensuring the right individuals have appropriate access levels.
- Incorporated JWT token-based authentication to enhance security, allowing for secure access control and user authentication.
- Integrated a client-to-administrator messaging system within the application for streamlined communication.
- Incorporated JWT token-based authentication for enhanced security, allowing secure access control and user authentication.
- Integrated a client-to-administrator messaging system within the application for streamlined communication.

Technologies: TypeScript, React.js, Redux.js, RTK Query, Reach Hook Form

File Drive — File management platform

- FileDrive is a comprehensive file management platform designed to streamline the process of storing, sharing, and managing files among individuals and organizations.
- With FileDrive, users can securely upload files of various types, including PDFs, images, PNGs, SVGs, and more.
- Users can create organizations to manage files within specific groups or teams and grant role-based access to files.
- The platform offers advanced features such as category-based file organization and authentication powered by Clerk. FileDrive also integrates with Convex, a third-party service, for backend operations.

Technologies: JavaScript, React Js, Next Js, Clerk(Authentication), Convex(Backend), Tailwind Css

EDUCATION

Ananda Mohan College, Mymensingh — *Bachelor of Science*

2018 - 2021

CGPA - 2.88 (Out of 4.00)
